

Bento Pay™

Simplified digital payments
for business

Peer-to-peer payment apps have transformed how people send money to each other, yet most businesses seem to be missing out.

Even as consumer payments rapidly move online, small businesses are still paying

80%

of invoices with paper checks.

Goldman Sachs

Paper just doesn't cut it anymore.

Introducing Bento Pay™

Simplified digital payments for business

The simplicity of modern consumer payments

Enterprise-grade security

Powerful controls

The best way for your business to pay other businesses digitally

Paying and getting paid can be as simple as a few clicks online.

Imagine always paying your business invoices digitally, in real time, with the same speed and convenience that today's consumer apps provide.

Imagine paying *any* of your suppliers with just their email address.

That's the genius of Bento Pay. No more hard-to-track paper checks, risky exchanges of sensitive payment information, and tedious handling of all the different ways you have to pay.

Know where your money is going.

Send, track and manage all digital payments and payees for your business in real time, from your Bento account. Authorize which admins can or cannot do the same.

Keep your business running, safely.

Payment is prompt and hassle-free for both sides, and does not require any exchange of confidential banking information. Your suppliers will find it easy to keep doing business with you!

Amazingly easy. Built for your business.

Send a digital payment to any supplier from your Bento account, using just their email address.

1. Send

From your Bento account, send a payment via Bento Pay with just the payee's email address.

No need to ask for their payment preference or bank account number.

2. Receive

Your payee receives an email that takes them to a secure page where they can review, accept or decline your payment, and choose how they prefer to be paid:

Get a one-time-use virtual card // Deposit directly into their bank account

3. Voilà! Payment Complete

Easy

- ✓ Pay using just the payee's email address
- ✓ Send and receive payments instantly
- ✓ Create and track all payments in one place

Flexible

- ✓ Works for any business, no matter their digital payment preference
- ✓ Pay and get paid the way you prefer
- ✓ No complex setup needed

Secure

- ✓ Eliminate unreliable and hard-to-track paper checks
- ✓ Tight control over when and how much to pay
- ✓ No need to exchange sensitive info at any point

Bento Pay brings the convenience and speed of peer-to-peer payments to small and mid-sized businesses, giving them the freedom and flexibility to modernize how they pay suppliers.

Bento for Business*

All Brides,

a wedding events management company, is looking forward to a client's big day and working with a long list of vendors: caterer, florist, photographers, DJ, hair and make-up artists... just to name a few.

Using Bento Pay, managing vendor payments is a breeze. When it's time to pay, All Brides simply needs to confirm which email address to send the payment to. Then, it only takes a few clicks to send it out to the right vendor.

- ✓ Avoids the stress of missing payments and lost checks
- ✓ Saves time and headaches since Bento Pay works for all vendors
- ✓ Easily downloads payment reports, when needed

A photograph of construction workers on a ladder, working on the exterior of a building. The workers are wearing hard hats, safety glasses, and work clothes. One worker in the foreground is wearing a white cap and a dark shirt, while another in the background is wearing a black cap. They are positioned on a wooden ladder against a light-colored building facade.

Modern Homes,

a construction company, works with many suppliers. It's time-consuming and unsafe to manage sensitive payment details from multiple contractors and suppliers, online and offline.

Using Bento Pay, Modern Homes keeps both their suppliers and employees happy and productive. In Modern Homes' Bento account, the finance manager saves a list of supplier payees with verified email addresses, and is ready to pay any of them on time, securely, without a lot of overhead.

- ✓ Streamlines workflow for everyone involved
- ✓ Easily accommodates more urgent payment needs
- ✓ Avoids delays and accounting oversight

Bento Pay tackles the problem of supplier enablement that plagues so many businesses today. We're helping Bento customers move away from complex, fragmented workflows towards a solution that is flexible and secure.

KBS Co.,

a professional services firm, recently moved to a new office. With so many installations and purchases happening, the KBS team of admins find themselves having to pay businesses large and small, some of which don't take cards.

Using Bento Pay, the KBS team handles all payments while keeping each other informed, avoiding costly mistakes and administrative overhead.

- ✓ Pays all vendors using one method
- ✓ Shares a real-time dashboard on payment history and status
- ✓ Ensures payment options and execution are done by authorized team members

It's more than just payments.

Bento Pay is built into the Bento for Business financial operating platform, which provides the control and visibility you need to manage business payments, spending and expenses in one central place.

In addition to Bento Pay, Bento offers a full range of payment options including direct ACH transfers, corporate debit cards and virtual cards.

Bento is easy to set up and use. Try it for free and see why we're helping thousands of businesses protect their cash, automate financial workflows and achieve better revenue.
